

Study of Aero- and Gas Dynamics

0. Download the books, study plan, and other materials

- Aerodynamics <https://aprender3.unb.br/course/view.php?id=7036>
- Gas Dynamics <https://aprender3.unb.br/course/view.php?id=7382>

1. **Follow the schedule** in Aprender 3.

2. Read the book according to the schedule.

3. Theory

See the videos about topics that are not clear from the book:

- Aerodynamics [Link](#)
- Gas Dynamics [Link](#)

4. Practice

See the videos about practical work:

- Aerodynamics [Link](#)
- Gas Dynamics [Link](#) and [Link](#)

5. If you still have questions, ask them in Aprender 3, forum “Dúvidas para discussão”. New questions will be explained. If a question is not new, the link with the answer will be sent.
6. During class time, all newly asked questions will be answered, recorded, and uploaded on YouTube for future reference. Previously asked questions will not be explained again.
7. The synchronous class will happen **ONLY** when there are questions to discuss, otherwise, the subject could be studied by the books and/or previously uploaded videos.
